

## Merronbrook, Leading the Way in Timber Engineered Products

For over half a century, Merronbrook has been at the forefront of supplying timber engineered products to developers and contractors across the Southeast of England. Our extensive experience and dedication to quality has made us a trusted partner in the construction industry.

### Why Merronbrook Chooses **easi-joist**<sup>®</sup>

Merronbrook's selection of the **easi-joist**<sup>®</sup> system is a testament to our commitment to providing innovative, high-quality products that meet the evolving needs of the construction industry.

### Installation Types

Joists can safely be installed in hangers, on a block wall or in a timber frame structure, whilst still maintaining all required thermal and sound transmission properties.

### What is an **easi-joist**<sup>®</sup> and its USPs

Using stress-graded timber chords, and plated together with Wolf System's precision-engineered metal web plates, these joists are available in a range of depths and widths, giving the **easi-joist**<sup>®</sup> unparalleled USPs.

- Superior Spanning Capabilities
- Integrated Service Voids
- Enhanced Structural Performance
- Lightweight and Easy to Handle
- Versatility in Application

### Why **Merronbrook**?

At Merronbrook, we are committed to innovation, quality, and customer satisfaction. Put your trust in Merronbrook and experience the difference that our **easi-joist**<sup>®</sup> system can make in delivering superior performance and value for your project.
